

Introduction to the Tsinghua University Student Field Study Team to Argentina

Presentación del Equipo de Estudiantes de la Universidad Tsinghua para la Investigación en Argentina

Tsinghua University's Xingjian College plans to organize **a student field study and academic exchange trip to Argentina** from **25 Jan to 2 Feb 2026**, lasting 10 days.

The program will focus on topics such as economic and social development, industrial transformation, and China–Argentina youth exchanges.

This brief is intended to introduce the basic situation of the delegation and to express our **sincere hope to hold discussions and exchanges with your institution during our visit.**

About Tsinghua University

Sobre la Universidad Tsinghua

Tsinghua University

Founded in 1911, Tsinghua University is a **leading comprehensive research university in China and worldwide**. It holds strong positions in engineering and technology, natural sciences, humanities and social sciences, economics and management, among other fields, and consistently ranks among the world's top universities: **1st in Asia and 12th globally** in the 2025 Times Higher Education World University Rankings; **17th globally** in the 2026 QS World University Rankings; **1st in Asia and 18th globally** in the 2025 Academic Ranking of World Universities (ARWU); and **1st in Asia and 11th globally** in the 2025–2026 U.S. News Best Global Universities rankings.

Tsinghua has a high-caliber faculty and research team, including many members of the Chinese Academy of Sciences and the Chinese Academy of Engineering, and a large, diverse student body of tens of thousands of undergraduate and master's and PhD students across multiple schools and residential colleges.

Student Field Study at Tsinghua University

Student field study is a core element of Tsinghua University's talent development system. The university uses real-world issues as learning contexts, encouraging students to deepen their understanding of China and the world while strengthening professional and cross-cultural skills.

In recent years, Tsinghua has organized **more than a thousand practice teams and tens of thousands of participants annually**. In 2024, the university organized 1,734 student field study teams with over 17,000 students. During the 2024 winter season, more than 700 faculty and students formed 44 international teams that visited 25 countries and regions across six continents, conducting joint research, academic forums, youth exchanges, and public service. Their work spans **grassroots governance, sustainable development, technological innovation, and international exchange**, contributing to a practice-based education system connecting the “classroom–society–world.”

About the Team

Sobre el equipo

Team Profile

This Argentina field study project is organized by **Xingjian College of Tsinghua University**, with **Professor Liu Qing from the Department of Economics, School of Economics and Management (SEM)**, serving as academic advisor and faculty leader.

The team plans to travel from **25 Jan to 2 Feb 2026**, for a total of 10 days. The main destination is Buenos Aires, with potential visits to surrounding cities, representative communities, and industrial parks depending on research needs. The delegation consists of **14 members**: 2 PhD students, 1 master's student and 11 undergraduates. Their academic backgrounds span **economics and finance, mechanics, aerospace engineering, civil and hydraulic engineering, vehicle engineering, and biological sciences**, combining both engineering and social science perspectives. This interdisciplinary composition will help the team understand economic and social development and industrial transformation from multiple angles.

Faculty Leader

Liu Qing, **tenured Associate Professor in the Department of Economics, School of Economics and Management, Tsinghua University**, and a key member of the school's academic leadership.

Professor Liu received his PhD in Economics from the University of Toronto in 2008 and has a strong background in international economics. His main research fields include **international macroeconomics, monetary economics, and development economics**, with a long-standing focus on **policy choices, structural reforms, and globalization challenges in open economies**. He has published widely in leading international journals such as *International Economic Review*, *Journal of Development Economics*, *Journal of International Economics*, and *Journal of International Money and Finance*.

In recent years, Professor Liu has paid close attention to economic developments in emerging markets and developing economies, including Latin America. He has in-depth research and unique insights on issues such as **Argentina's economic structure, inflation control, exchange rate regimes, and China-Latin America economic cooperation**. During this field study, he will draw on his macro perspective and professional expertise to guide students in understanding the complexity and uniqueness of Argentina's economic and social development from a comparative economics perspective, and to explore potential opportunities for China-Argentina cooperation.

Research Themes

Temas de investigación

Background

Argentina is one of the major economies in Latin America and the Global South, endowed with abundant natural resources, a rich historical and cultural heritage, and a solid foundation in agriculture, energy, industry, and services. It has long played a key role in regional integration and international cooperation.

In recent years, Argentina has faced unique development challenges and is undergoing profound economic and social transformation. It has developed **representative policy practices and experiences in macroeconomic management, industrial restructuring, social policy innovation, and external openness**. These reform efforts offer important reference value for many developing countries and emerging economies, including China, and provide a rare opportunity for China–Argentina youth to conduct joint research and exchanges in a real country context.

Proposed Research Themes

The delegation aims, under the premise of fully respecting Argentina’s national conditions and development choices, to approach the visit with a spirit of “mutual learning and equal dialogue”, focusing on the following research and exchange themes:

— **Economic Development, Social Resilience, and Public Policy**

The team will study Argentina’s approaches to **managing macroeconomic volatility (inflation, exchange rates), promoting inclusive growth, and strengthening social safety nets**. Key interests include how the digital economy empowers traditional industries, the implementation and impact of recent government reforms, and how resilience is built at macro, meso, and micro levels.

— **Industrial Transformation, Green Development, and China–Argentina Cooperation**

The team will focus on Argentina’s planning and advantages in **lithium and other key minerals, modern agricultural technology, and renewable energy (wind and solar)**. Drawing on China’s experience, the delegation will explore opportunities for green investment, technology cooperation, and sustainable supply-chain development.

— **Youth Development, Innovation, and the Future**

By engaging with Argentine university students, young entrepreneurs, and youth organizations, the team will learn about local opportunities and challenges in **tech entrepreneurship, creative industries, and social innovation**, and explore how youth in both countries can use digital platforms to collaborate in cultural exchange, joint entrepreneurship, and global issues.

Proposed Formats for Exchange and Cooperation

Formatos propuestos para el intercambio y la cooperación

Proposed Formats for Exchange and Cooperation

We hope to explore the following forms of cooperation with your institution, which can be adjusted to your needs. Our aim is not a one-way briefing, but a two-way, substantive dialogue based on shared interests. The team members have prepared background research and look forward to sharing perspectives from Chinese youth.

— **Thematic Briefings or Lectures**

We would appreciate a brief introduction from your experts or representatives on your institution's mission and structure, or ongoing research, projects, or initiatives related to the themes above. This will help the delegation systematically understand the local context.

— **Case Sharing and On-site Visits**

If your institution has representative projects in corporate initiatives, public policy practice, community programs, or research collaboration, we would welcome brief introductions or on-site visits. First-hand explanations on project background, implementation, and key lessons would enhance students' understanding of local realities.

— **Roundtable Discussions or Seminars**

We propose roundtable discussions on topics of mutual interest, such as industrial and regional development, urban and community governance, youth development policies, regional and international cooperation. Representatives from your institution and Tsinghua students can share insights in an open discussion format.

— **China–Argentina Youth Exchange**

We invite student groups, young researchers, or young staff from your institution to join small, interactive exchanges with our delegation on topics such as youth career planning, social development, China–Argentina perceptions, and shared global challenges. These dialogues aim to deepen mutual understanding and build long-term connections.

We are flexible with scheduling and language. English will be the primary working language, and we can provide a brief written summary after the visit if needed.

Expected Outcomes and Prospects for Follow-up Cooperation

- After the field study, the delegation will prepare an **integrated practice report and thematic summaries**. With your institution's consent, relevant sections may be compiled into brief case materials for use in teaching, training, project design, or outreach on both sides.
- If appropriate and approved, we may also work with **Chinese or Argentine media** to feature short stories or interviews on China–Argentina youth cooperation, highlighting your institution's experience and increasing the visibility of our collaboration.
- We hope this visit will serve as a starting point for longer-term cooperation — such as **student exchanges, short-term field programs, joint workshops, and collaborative research** — and would be pleased to welcome your delegations to Tsinghua University in the future.

Thank you very much for your time and consideration.

If your institution is willing to host our delegation or has any suggestions on the exchange format,
we will be happy to accommodate and coordinate the timing, agenda, and participants.

For any further information, **please feel free to contact us.**
We would be glad to provide additional details.
